SUMMARY

Certified Scrum Product Owner (CSPO) with 4+ years of experience in Business Analysis, Product Management, and Digital Transformation. Proven expertise in end-to-end product development, cross-functional team leadership, and driving strategic initiatives across SaaS and enterprise platforms. Specializing in requirement elicitation, product roadmap definition, backlog prioritization, process optimization, and stakeholder alignment. Track record of delivering complex solutions that enhance operational efficiency and user experience. Adept at leveraging agile frameworks and modern tools to translate business requirements into scalable, data-driven solutions aligned with organizational objectives

WORK EXPERIENCE

Total Years of Experience - 4 Years and 6 Months

Senior Business Analyst, Air India

Feb 2024 - Present (2 Years and 4 Months)

- Led end-to-end analysis and transformation of a mission-critical enterprise system, identifying process gaps and defining optimized future-state processes.
- Currently supporting the implementation of a Revenue Management system, a strategic systems initiative, managing product scope, stakeholder alignment, and delivery timelines.
- Conducted comprehensive Fit-Gap Analysis using Confluence to align system requirements with business goals.
- Collaborated with cross-functional teams to perform Factory Acceptance Testing (FAT) and System Acceptance Testing (SAT) via Azure DevOps.
- Facilitated User Acceptance Testing (UAT) and managed Go-Live operations, providing real-time support and change management to ensure smooth transition from legacy systems.
- Designed and delivered executive-level dashboards and operational reports to enable data-driven decision-making for C-suite stakeholders.
- Facilitated organizational change management and end-user adoption through comprehensive training programs and documentation.

Business Analyst, IBS Software

Dec 2021 - Feb 2024 (2 Years and 2 Months)

- Owned product strategy by defining roadmap, prioritizing backlog, and driving product vision alignment across development teams (14+ developers, frontend & backend)
- Managed full product lifecycle: requirement elicitation, user story creation, sprint planning, and feature delivery using agile frameworks
- Conducted impact analysis and root cause analysis for defects; prepared detailed Business Requirement Documents (BRDs) and functional specifications
- Performed quality assurance and testing governance: led Factory Acceptance Testing, System Testing, and User Acceptance Testing to ensure deliverables met business and technical standards
- Drove product improvements through stakeholder communication, regular product review presentations, and feedback-driven iteration cycles
- Developed user adoption enablement materials including comprehensive user manuals, training documentation, and knowledge base articles
- Collaborated with cross-functional teams (product, engineering, QA, support) to resolve production issues and implement continuous improvements

EDUCATION

MBA in Marketing and HR

Acharya Bangalore B School

2019-2021

B.Tech in Mechanical Engineering

Musaliar College of Engineering and Tech

2015-2019

SKILLS & TOOLS

Business Analysis & Product Management

Requirement Elicitation · Product Roadmap & Backlog Management · Stakeholder Management · Process Mapping & Optimization · Change Management · Fit-Gap Analysis · Agile & Scrum Framework · User Story Writing · Use Case Definition

Tools & Technologies

JIRA · Confluence · Azure DevOps · Power BI · MS Excel / Word / PowerPoint · Azure Databricks · SQL · Figma / Wireframing Tools

Quality & Testing

Factory Acceptance Testing (FAT) · System Acceptance Testing (SAT) · User Acceptance Testing (UAT) · Root Cause Analysis · Defect Management · Quality Assurance Governance

CERTIFICATIONS

- Certified Scrum Product Owner (CSPO) - Scrum Alliance
- Agile Scrum Master - Simplilearn
- Power BI Dashboard for Beginners - LinkedIn Learning
- SQL - Simplilearn

ACHIEVEMENTS

- Awarded "AI High Flyer" for Digitisation and Transformation initiatives at Air India.
- Awarded "Star of the Month" at IBS Software for improving ERP system performance.
- Recognized as "Team Champ" for leading a team of 14 developers and delivering a complex module ahead of deadlines.
- Successfully led the mission-critical enterprise system transformation at Air India, improving system and process efficiency.

BUSINESS PROJECTS

AI-Driven Document Automation & Process Optimization, Air India (Ongoing)

Designed and supported an AI-driven automation solution leveraging machine learning and document intelligence to automatically extract, validate, and reconcile data from high-volume documents such as GHA invoices and AWBs, significantly reducing manual effort and billing errors. The solution integrates with the cargo management system, SAP, and third-party vendor platforms to enable seamless interoperability, anomaly detection, and end-to-end process automation across cargo operations

Data Warehouse Reporting & Dashboards, Air India (Ongoing)

Developed a centralized reporting and dashboard platform enabling air cargo bases to monitor real-time and historical operations through unified, role-based dashboards. The solution aggregates data from the Cargo Management System and the enterprise data warehouse to provide end-to-end visibility into operational and financial KPIs, supporting strategic decision-making, performance optimization, and proactive issue resolution.

Revenue Management Platform Integration, Air India (Ongoing)

Currently supporting the Revenue Management integration project to connect Air India's pricing and revenue optimization products (RTS Velocity and Accelerate) with the iCargo cargo management platform using API and SFTP interfaces. The initiative focuses on designing and governing end-to-end integration flows, aligning business and technical stakeholders, and ensuring accurate, timely exchange of demand, pricing, and booking data to improve revenue performance and operational efficiency.

ERP System Modernization, Air India (Duration ~ 1.5 Years)

Led the implementation of a next-generation cargo management platform (iCargo) to replace the legacy Cargo Management System (Unisys), automating key functions across sales, operations, revenue accounting, mail, and customer servicing to support the airline's digital cargo transformation.

Next-Generation Logistics Platform Implementation – DHL, IBS Software (Duration ~ 1.5 Years)

Served as a product consultant supporting the implementation of the iCargo Neo platform for DHL, acting as a bridge between customer operations and product engineering teams. Collaborated on requirement clarification, solution design, configuration, and issue resolution, ensuring that the product capabilities were aligned with DHL's business processes and that the new platform was adopted smoothly across stakeholders.

Neo Platform Transformation, IBS Software (Duration ~ 2 Years)

Contributed to the modernization of IBS Software's Neo Platform by transforming key business modules from the legacy system to the new platform, enhancing performance, scalability, and usability. Led requirement analysis, backlog prioritization, and coordination with a 14-member development team to deliver incremental releases, improve system stability, and support smoother customer adoption.

EXTRACURRICULAR ACTIVITIES

Playing football and cricket to enhance team collaboration and physical fitness.
